ALMITA MANUFACTURING LTD. hires another Engineer –
2010's second expansion to its Engineering team.

Ponoka, AB – Larry Kaumeyer, President of Almita Manufacturing Ltd., is pleased to announce the addition of the latest member to Almita's Engineering team; Mr. Yahia Ebrahim.

"Mr. Ebrahim joins Almita in the role of Engineering Intern Training - EIT and Testing Technologist. His initial focus will be to learn and then support Almita's load testing and field requirements from an engineering perspective. Ebrahim is already familiar with screw piles and his vast computer skills will complement the current team's knowledge and assist in moving Almita forward as a leader in providing engineered screw pile solutions," says Kaumeyer.

In his new role, Ebrahim will be working closely with Dr. Mohammed Sakr, Almita's lead Geo-technical Engineer, to assist with his expertise in load testing and installation technologies of screw piles.

Ebrahim holds a Masters Degree in Structural Engineering from the Memorial University in Newfoundland. His computer knowledge and skills include; Finite Element Analysis software (ANSYS) and Steel and Concrete Analysis software or STAAD.
